

Stainless steel Locking Assemblies, Locking Elements and Shrink Discs

Stainless steel Shaft/Hub Connections, Locking Assemblies and Shrink Discs are nowadays increasingly requested for applications in the

Applications

Cover of meat cutting machine,
installed with corrosion resistant
locking assemblies

Bottle capping machine,
resists effects of foam cleaner

- food industry
- chemical industry
- paper industry

Our strength – your benefit

- high resistance against corrosion
- salt spray tested
- stainless steel grades compatible with food applications
- removable even in very aggressive environments, e.g. in applications in salt plants
- long life cycle

Stainless steel
